## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 08 June 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the zone defined by the circle center of the second shaft opening and the range defined by the base line  $\pm 10$  degrees, the base line formed by formed by the equipartition plane of the opposing front end and the rear end intersecting with the board as recited in claim 1, the position mark as recited in claim 2, the point mark or a line mark as recited in claim 3 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. **Claims 1-8** are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The zone defined by the circle center of the second shaft opening and the range defined by the base line  $\pm 10$  degrees, the base line formed by formed by the equipartition

Art Unit: 2834

plane of the opposing front end and the rear end intersecting with the board as recited in claim 1 are not shown in the drawings and described in clear and concise form in the specification.

4. **Claims 1-8** are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. For the reasons indicated above one skilled in the art would not be able to make and/or use the invention.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. **Claims 1-8** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 15, “precisely” is indefinite since the specification does not provide criteria for the recited limitation and the resulting claim does not clearly set forth the metes and bounds of the patent protection desired, lines 15-16, “to improve electric current, air pressure and air flow rate and rotation speed” does not make sense.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2834

8. **Claims 1-4** are rejected under 35 U.S.C. 102(b) as being anticipated by **Horng (US 5,967,763)**.

**Horng** discloses in Figures 1 and 2 invention as claimed: a stator having a first shaft opening 15 and a plurality of pole struts 11 having a front 13 opposing and an end 14 of the neighboring pole strut, a circuit board 2 having a second shaft opening engageable with the stator, an induction element 23 located at a selected position to position the stator 1 precisely with respect to the induction element using the position mark 24.

The claimed enhanced fan durability is inherent to the disclosed structure.

9. **Claims 5-8** are rejected under 35 U.S.C. 102(b) as being anticipated by **Horng (US 6,109,892)**.

**Horng** discloses in Figures 1 and 2 invention as claimed: a stator having an upper pole sheet 11 having a front end and a lower pole sheet 12 having a rear end, a circuit board 2 having a second shaft opening engageable with the stator, an induction element 23 located at a selected position to position the stator 1 precisely with respect to the induction element using the position mark 24.

The claimed enhanced fan durability is inherent to the disclosed structure.

***Prior Art***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
